DA-IICT is a private university devoted to the field of ICT. Established in 2001 by the Reliance group, DA-IICT is widely seen as an institution "with a difference" in terms of its academic programs, faculty profiles and overall ambience. It is consistently ranked as one of the best engineering institutes in the country in the fields of computer science, electronics and communication engineering, and information technology. The key strengths of DA-IICT are:

- **Interdisciplinary programs.** DA-IICT is the first university in India to offer an undergraduate program in ICT, an interdisciplinary area formed by the merging of electronics, computer science, communication engineering, and information technology. It is also the first university in the country to offer a postgraduate program in ICT applications in the fields of agriculture and rural development. In keeping with its commitment to curriculum innovation, DA-IICT recently introduced a new specialization in computational science, at the undergraduate level. DA-IICT is deeply committed to seeing its students as responsible citizens. Its social science courses and the rural internship program are designed to give a strong sense of cultural roots and social questions to the students.
- **Research-led faculty.** DA-IICT has more than 50 full PhD faculty with strong research credentials. The faculty members have authored quality books that have been internationally recognized. They have attracted a large number of sponsored projects, including collaborative projects with academic institutions in UK, France, Spain and Japan, with funding from government bodies such as DST and DIT. The Institute also has research funding from industry for supporting PhD research scholars. The Institute houses a government supported Incubation Center to nurture and develop business ideas based on new technology.
- **High-caliber student body.** The students of DA-IICT have shown commendable creativity in winning prizes at various technical competitions. They have won a number of prestigious awards and laurels including Google Women in Engineering, Google Summer of Code, Microsoft Imagine Cup, HP Innovation Prize. An alumnus of DA-IICT recently won the Rolex Young Laureate Award. The graduates of the Institute have been employed by the public sector, industry, Civil Society Organizations (CSOs), and academia. They are highly rated by these organisations, both technically and professionally. A significant number of graduates have started their own companies.

Confederation of Indian Industry

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering industry, Government, and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, playing a proactive role in India's development process. Founded in 1895, India's premier business association has over 7200 members, from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 100,000 enterprises from around 242 national and regional sectoral industry bodies.

CII charts change by working closely with Government on policy issues, interfacing with thought leaders, and enhancing efficiency, competitiveness and business opportunities for industry through a range of specialized services and strategic global linkages. It also provides a platform for consensus-building and networking on key issues.

Extending its agenda beyond business, CII assists industry to identify and execute corporate citizenship programmes. Partnerships with civil society organizations carry forward corporate initiatives for integrated and inclusive development across diverse domains including affirmative action, healthcare, education, livelihood, diversity management, skill development, empowerment of women, and water, to name a few.

The CII theme of 'Accelerating Growth, Creating Employment' for 2014-15 aims to strengthen a growth process that meets the aspirations of today's India. During the year, CII will specially focus on economic growth, education, skill development, manufacturing, investments, ease of doing business, export competitiveness, legal and regulatory architecture, labour law reforms and entrepreneurship as growth enablers.

With 64 offices, including 9 Centres of Excellence, in India, and 7 overseas offices in Australia, China, Egypt, France, Singapore, UK, and USA, as well as institutional partnerships with 312 counterpart organizations in 106 countries, CII serves as a reference point for Indian industry and the international business community.
